

## SECTION 5 Security details module

### Application for a licence under the *Narcotic Drugs Act 1967* (Cth)

#### Important notice

This module forms one of a series of specific parts making up an application for a licence under the [Narcotic Drugs Act 1967](#) (Cth). This module must be attached and submitted along with all other parts in order to form a materially complete application..

#### Information required

This module requests information relating to security details being requirements to be met in order for the grant of a licence to be considered. You will be asked to explain the security measures and then provide the document used by your business to ensure this outcome is achieved.

#### Security details

You are required to provide your proprietary security plan. This document must contain details of the measures that will be in place to ensure the physical security of the cannabis plants, cannabis and cannabis resin in your possession or control or that is cultivated, produced, obtained or manufactured under the licence. If your security plan is too large to attach as a single document, you may consider dividing the document into separate chapters.

Information on security requirements can be found in [Guideline: Security of Medicinal Cannabis](#) on the Office of Drug Control website at [www.odc.gov.au](http://www.odc.gov.au).

##### 5.1 Provide details of the measures that will be in place to ensure the physical security of the cannabis plants, cannabis or cannabis resin, drugs or starting material:

- in the applicant's possession or control, or
- obtained, cultivated, produced or manufactured under the licence.

If you need more space to clearly answer this question, attach a separate sheet labelled appropriately.

##### Attach your proprietary document(s) containing this detail.

If your proprietary security plan is too large to attach as a single document, you may consider dividing the document into separate chapters.

Identify the file name/s of the relevant document or chapters (whichever is applicable)
